

Woodway Lattice – Architectural Specification

Lattice shall be Woodway Quality Lattice, as manufactured by LWO Corporation, or equal. Lattice shall be graded based on the Western Wood Products Association Lath Grading Rules, consisting of (name one) **Clear grade**, made entirely of smooth-sawn, clear lath, with glue-coated stainless steel staples, or **No. 1 grade**, using electroplated, galvanized, glue coated staples, made from smooth-sawn lath, allowing sound knots and other minor defects. Lattice shall have lath fastening, augmented by at least four (4) lines of industrial gluing. All lattice shall have alternate, opposed-angle stapling, set parallel with the wood grain. Panel edges are opposite, double-angle fastened and panel ends are double fastened. One panel face shall be free of visible fasteners.
